

# Esophageal and Airway Center

Primary Children's Hospital

The Esophageal and Airway Center at Primary Children's Hospital is a multidisciplinary center, in partnership with the University of Utah School of Medicine, that specializes in the coordinated care and treatment of congenital or acquired conditions causing complications with the throat, esophagus, and airway.

Our center coordinates care between pediatric specialists in general and thoracic surgery, ENT, gastroenterology, and cardiac surgery as well as a dietitian and swallowing experts. We help and support patients and families from diagnosis through surgery and long term follow-up, including outpatient therapy.

## Conditions We Treat

- Bronchogenic Cyst
- Esophageal Strictures
- Congenital Malformations
- Esophageal Atresia
- Laryngeal Stenosis
- Tracheoesophageal Fistulas
- Tracheomalacia
- Vascular Rings
- Tracheal Stenosis
- Achalasia

## What Sets Our Program Apart

### We Specialize in Rare & Complex Conditions

Our team of providers are experienced and highly skilled in treating complex conditions that other providers and programs rarely see.

### All Providers Trained in Pediatrics

Every provider in our center is board certified/eligible and fellowship trained in pediatric specialties.

### Innovative Care with the Latest Research

Our partnership with the University of Utah ensures the latest techniques and most innovative, evidence-based care is used.

### Expertise of a Nationally Ranked Children's Hospital

We are proud to rank as a best children's hospital in 9 pediatric specialties by the 2018 U.S. News & World Report Best Children's Hospital survey.
